USBmon's ODBC interface allows you to easily connect to the reporting database and generate reports using Excel, MS Access and Crystal Reports. In the rport above the USBmon file removal USER ID liast and Pie Chart tell you which employees are the high users, Who is takeing home the companys intellectual data as seen in this excel report. USBmon also provides you with a Content Removal Report which list "who, removed what specific files". Remember when an employee copys your corporate assests to their own personal USB mass storage devcie, there is no record kept - USBmon gives you the option to both prevent it or monitor it...
